

MGA

Academic Program - Course Schedule and Learning Outcomes

Campus: Cochran

College/School: SOHNS

Department:
Rehabilitation
Science

Academic Degree:
B.S.

Major: Rehabilitation Science

Track (if applicable):

What are the Program Learning Outcomes?

A learning outcome is a description of the knowledge, skills and abilities you will gain as you complete your coursework.

1. The student will be able to correctly identify pathophysiology and related symptoms in order to understand best practice for recovery or adaptation.

2. The student will collaborate with an interdisciplinary team to make recommendations to improve an individual's quality of life.

3. The student will make appropriate decisions regarding the need for environmental modifications or assistive technology to maximize human performance within rehabilitation facilities, the home, and/or community.

4. The student will be proficient with documentation, professionalism, and cultural competence in a rehabilitation setting.
