Zenith Laptop

The Zenith Model ZWL-183-93 is a vintage laptop computer that was manufactured in 1987. It is a portable, fully PC-compatible computer that runs on MS-DOS 3.21 and has a NEC 8088 CPU, 640KB RAM, and a 20MB hard drive. It also has a built-in modem, a 3.5" 720k floppy disk drive, and an LCD screen that can display 80 or 40 characters per line.

The laptop has a number of external ports, such as serial, parallel, RGB monitor, and external 5.25" floppy disk drive. It can switch between 4.77 or 8 MHz speed and has a diagnostic monitor ROM that provides various options and settings. It weighs a whopping 12 pounds and retailed around $2000. No discontinuation date has been found, but it is believed to have only been manufactured for part of 1987, making it quite rare
